EUROPA PARKING LIGHTS

(Not Dated)

Remove existing Lucas "European" headlamp units, Clip black ground wire for parking lamp at headlamp connector. DO NOT CLIP MAIN GROUND WIRE! Clip red parking lamp hot wire 1" to 2" from socket. Install standard sealed beams.

Parking lamp placement will depend on state laws for height and width. Perhaps installing them right above or below the present signal lamps would do. However, we have seen one set installed 2" below the front bumper and 6" to 8" either side of the grille opening.

The red parking lamp wire is of sufficient length to take care of any placement of the parking lights. A suitable ground will also have to be run.
